

A & Al Series Float & Thermostatic Steam Trap

Cast Iron for Horizontal Installation, With Thermostatic Air Vent

For Pressures to 175 psig (12 bar)...Capacities to 8,600 lb/hr (3,900 kg/hr)

Model A Traps

Description

Armstrong A & AI Series F&T traps are for industrial service from 0 to 175 psig and feature a balanced pressure phosphor-bronze type bellows caged in stainless steel. Armstrong A & AI Series F&T traps are designed for service on heat exchange equipment where there is a need to vent air and non-condensable gases quickly.

The **AI Series F&T** traps feature the convenience of in-line connections with the same rugged internals found in the A Series.

Maximum Operating Conditions

Maximum allowable pressure (vessel design): 175 psig @ 377°F (12 bar @ 191°C)

Maximum operating pressure:

| Model 30-A, AI: | 30 psig (2 bar) saturated steam |
|------------------|------------------------------------|
| Model 75-A, AI: | 75 psig (5 bar) saturated steam |
| Model 125-A, AI: | 125 psig (8.5 bar) saturated steam |
| Model 175-A, AI: | 175 psig (12 bar) saturated steam |

NOTE: Cast iron traps should not be used in systems where excessive hydraulic or thermal shock are present.

Connections

Screwed NPT and BSPT

Materials

| Body and cap: | ASTM A48 Class 30 |
|------------------------|--|
| Internals: | All stainless steel—304 |
| Valve: | Stainless steel—440 |
| Seat: | Stainless steel—303 (ASTM A582) |
| | Stainless steel—440F in 1-1/2" and 2" |
| Thermostatic air vent: | Stainless steel and bronze with phosphor |

Model AI Traps

Options

Integral vacuum breaker. Add suffix VB to model number.

CAUTION: Do not use a conventional vacuum breaker open to the atmosphere in any system that incorporates a mechanical return system that carries pressure less than atmospheric pressure. This includes all return systems designated as vacuum returns, variable vacuum returns or subatmospheric returns. If a vacuum breaker must be installed in such a system, it should be of the type that is loaded to open only when the vacuum reaches a calibrated level well in excess of the design characteristics of the system.

Specification

Float and thermostatic steam trap, type ... in cast iron, with thermostatic air vent.

A & Al Series Float & Thermostatic Steam Trap

Cast Iron for Horizontal Installation, With Thermostatic Air Vent For Pressures to 175 psig (12 bar)...Capacities to 8,600 lb/hr (3,900 kg/hr)

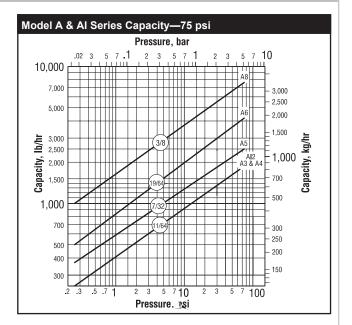

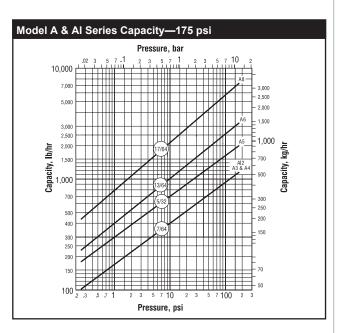

Options

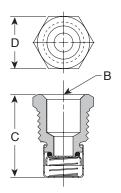

Vacuum Breaker—3/8" (10 mm) and 1/2" (15 mm) NPT Many times, condensate will be retained ahead of steam traps because of the presence of a vacuum. To break a vacuum, air must be introduced into the system by means of a vacuum breaker.

For maximum protection against freezing and water hammer in condensing equipment under modulated control, vacuum breakers are recommended. Armstrong A and AI Series F&T Traps are available with integral vacuum breakers. Maximum service pressure is 150 psig (10 bar).
